SUMMARY

Result-driven Junior React.js Developer with over 1.5 years of experience in building scalable web applications. Skilled in frontend development with a basic understanding of backend technologies. Experienced in working with cross-functional teams to improve user experiences. A proactive problem-solver focused on delivering high-quality solutions and ready to contribute effectively from day one.

EDUCATION

Bachelor's Degree   2019-22
St. Aloysius Institute of Technology   R.G.P.V Bhopal
CGPA - 8.22

Diploma   2015-18
St. Aloysius Institute of Technology   R.G.P.V Bhopal
CGPA - 7.79

SKILLS

ReactJs, Redux Toolkit, Recoil, VueJs, NuxtJs, Pinia, Javascript, HTML, CSS, Bootstrap,

NodeJs, MongoDb, ExpressJs, Sanity, Strapi

Github, GitFlow

PROFESSIONAL EXPERIENCE

Techgrospe Pvt. Ltd.   Oct 2023 - Present
Junior ReactJs Developer   Remote

Key Responsibilities

- Developed and maintained **10+** scalable web applications using React.js, Redux Toolkit, and modern web technologies.
- Collaborated with backend engineers and designers to streamline feature integration, accelerating development cycles and improving deployment efficiency.
- Optimized application performance by implementing code-splitting, lazy loading, and memoization, leading to faster load times and a smoother user experience.
- Implemented **authentication** and **authorization**, ensuring secure access for a platform with **5** distinct user roles, each with **role-based permissions and access control**.
- Proactively identified and fixed critical bugs, improving application stability and user satisfaction.
- Integrated multilingual support, including English and Arabic (RTL adjustments), improving accessibility for global users.

Reveation Labs   May 2023 - Sep 2023
Frontend Developer Intern   Remote

Project Contributions

- Translated **4 Figma & Canva** designs into responsive **Vue.js and Nuxt.js** components, ensuring a 90% design match, with mobile responsive first approach.
- Contributed to multiple projects, enhancing UI development and demonstrating adaptability across various domains.
- Integrated **Sanity and Strapi CMS** on few projects, reducing backend development efforts by enabling dynamic content management, thereby accelerating content updates and deployment cycles.
- Gained proficiency in **Vue.js, Nuxt.js, Sanity, Strapi**, and Capacitor, expanding technical expertise.

PERSONAL PROJECTS

Pulse Share
https://blood-help.netlify.app 🌐
https://github.com/PramodK2807/blood-donate 🎧

Key Features

- Built a platform that allows users to request specific blood types and specify their hospital location.
- Displays all generated requests in a table for easy access and management.
- Focused on user-friendly design, data accessibility, and seamless request management.

SwiEat
https://sweatmern.onrender.com 🌐
https://github.com/PramodK2807/swieat.git 🎧

Key Features

- Created a meal browsing platform where users can explore various meal categories based on their preferences.
- Designed a backend schema that stores each restaurant with its city location, enabling users to manually filter restaurants by city.
- Implemented multiple meal categories to cater to diverse user preferences.
- Built as a full-stack MERN application using MongoDB, Express.js, React.js, and Node.js.
